Curriculum Construction 2013-10-24

The Curriculum of the Elementary School 1964 the term quality is frequently used in early years practice both in professional discussions and in key policy and literature but often without question or an agreed understanding of what quality is and as though it is an entirely unproblematic concept through a series of inspiring and thought provoking chapters this book supports you in considering and developing your own notion of quality early years practice across a broad range of key strands of early years provision from the environment to policies from work with vulnerable children and babies to curriculum and research this book helps you to construct your own idea of quality and challenges you to develop your own understanding through stimulating discussion and reflection points a key argument is that whilst there are several indicators and measures of quality there is no one universally agreed definition of quality

in early years provision and hence developing your own notion of quality and working towards that with others is paramount key features include consideration of what quality looks like within a contemporary early years landscape how you might deliver quality practice when other influences might appear to hinder or contradict this reflection points to help you embed and link your learning to practice a graduated approach for a greater depth of engagement with the topic and relevant literature with each chapter written by an early years expert quality in the early years is a vital companion for those studying towards any early years qualification as well as established practitioners and leaders within the field

Differentiation in Practice 2004 what should we teach in our schools and vocational education and higher education institutions is

theoretical knowledge still important this book argues that providing students with access to knowledge should be the *raison d'être* of education its premise is that access to knowledge is an issue of social justice because society uses it to conduct its debates and controversies theoretical knowledge is increasingly marginalised in curriculum in all sectors of education particularly in competency based training which is the dominant curriculum model in vocational education in many countries this book uses competency based training to explore the negative consequences that arise when knowledge is displaced in curriculum in favour of a focus on workplace relevance the book takes a unique approach by using the sociology of basil bernstein and the philosophy of critical realism as complementary modes of theorising to extend and develop social realist arguments about the role of knowledge in curriculum both approaches are increasingly influential in education and the social sciences and the book will be helpful for those seeking an accessible introduction to these complex subjects why knowledge matters in curriculum is a key reading for those interested in the sociology of education curriculum studies work based learning vocational education higher education adult and community education tertiary education policy and lifelong learning more broadly
